

Managing Safety Performance through Business Transformation and Restructure

Highlights

- Initial 2 month embedded consulting support extended to 6 months.
- Transition from independent company to new global business owner and location whilst maintaining excellent safety performance.
- Maintenance of seamless WHS performance management, reporting and customer liaison during critical business integration environment.
- Successful recruitment and handover support to new safety professional.

Testimonial

Jess Maddren – Manager, ALS Earth Data

“Our clients in the Oil & Gas sector insist on robust and consistent safety management systems and performance.

By partnering with SafetyWorks we were confident our critical safety systems and processes were being expertly managed during a period of significant organisational change; helping to keep our people safe and our clients happy.

SafetyWorks were able to quickly understand our systems, processes, reporting, and culture, and provide valuable expert guidance and direction for our leadership team and staff members. They also assisted in recruiting and orienting a permanent safety professional into the role.

SafetyWorks’ approach, attitude and capability exemplify their ability to value-add to organisational performance and culture.”
