

Safe Behaviours on-shore and off-shore

Highlights

- Supporting Fugro Survey to provide a robust Behavioural Safety Process capability as part of their overall commitment supporting Chevrans core safety values across 14 projects.
- Land based to off-shore application. People now trained and coached both on-land and at sea by SafetyWorks.
- Program longevity: initially implemented in 2010 the program is still running strongly after 4 years autonomously managed by local employee champions and an active Employee Steering Committee. There are 250 trained facilitators.
- During 2012/2013 287 observations realising 287 extra safety conversations as a result of feedback coming directly from observed safety practices.
- Yardstick safety behaviour performance with all high risk activities averaging above 80% safe.

Results

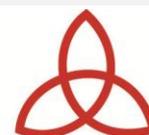

Testimonials

Comments from GroSAFE facilitators

"To proactively talk to people about their actions, without the fears that dogged these kind of conversations only a few short years ago, is a fundamental change in the offshore culture towards safety. BBS systems have been a major factor in these changes. GroSAFE allows us to join in, break down those barriers and have those safety conversations".

"I was extremely sceptical of the GroSAFE process but through the facilitators training, I learnt how to encourage positive behaviour rather than picking at the negative. I find this to not only be a good trait in everyday life, but useful when encouraging safety. Thanks for that, I'll keep on passing it on!"

"Having been involved with GroSAFE as an observer and observee I have seen firsthand the benefits of the program. The informal peer to peer nature of the initiative allows safety to be brought up, thought about and discussed, without the feeling of being 'told off' that you might get when discussing safety with management or your supervisor. The feedback you gain from this kind of program is a lot more specific and has a genuine feeling when it comes from someone who is working 'at the coalface' beside you."
